# COMPLIANCE

The following whitepaper is intended to be a technical overview. It is not intended to be comprehensive nor to be the final design. Noncritical aspects are not covered. This paper consists of information given for discussion purposes only and does not represent investment advice of any kind. Further, it does not constitute an offer to sell shares or securities, nor does it constitute a solicitation to buy such shares or securities. None of the information found within is intended to influence any investment decision nor should it be the basis of an investment decision of any kind. Investment advice for investment in any security, or any tax or legal advice should only be given by an investment advisor, and Baby Sanji is not an investment advisor. Baby Sanji encourages readers to seek appropriate and independent professional advice to inform themselves of the legal requirements and tax consequences of any investments they make, both within Baby Sanji and within the blockchain industry as a whole. Investments should only be done with the help of an independent financial advisor within the context of the countries of their citizenship or residence, and their place of business with respect to the acquisition, holding or trade in Baby Sanji or any other tokens. Please note that this Whitepaper does not constitute an offer to sell, or the solicitation of an offer to buy, for any person for whom it may be unlawful to participate in a token sale. Those for whom it is unlawful to participate should not participate. Consult with your own lawyer or accountant to determine whether it is lawful for you to participate in this token sale. This Whitepaper should in no way be construed as being intended to create a contract for investment. This Whitepaper (version 1.0) may be

revised, with the newest edition always appearing on our website. For each revision cycle, we will provide notes on what has changed and the justification for the change. Updated versions of the Whitepaper (as indicated by consecutive edition numbers) may contain information which may override, clarify, or contradict previous editions, in which case the latest version should be considered the most accurate and up to date. Because of this, versions which are found outside of the Baby Sanji website may contain out-of-date or inaccurate information.

# DISCLAIMER

The attached white paper is meant to describe Baby Sanji is current anticipated plans for developing its business and Baby Sanji Tokens. Nothing in this document should be treated or read as a guarantee or promise of how Baby Sanji is business will develop or of the utility or value of Baby Sanji; the document outlines our current plans, which could change at our discretion, and the success of which will depend on many factors outside our control, including marketbased factors and factors within the cryptocurrency industries, among others. Any statements about future events are based solely on our analysis of the issues described in this document, and our analysis may prove to be incorrect. # OVERVIEW

Baby Sanji offers a robust DeFi platform, allowing users to swap between different cryptocurrencies, earn passive income through staking, farming, and play-to-earn gaming that evolve as the blockchain technology progresses. Baby Sanji will also give back to the causes you care for.

# PREFACE

Cryptocurrency and blockchain have forever changed the way that the financial markets work. With options such as centralized exchanges, lending and borrowing, or staking, the space has become inundated with different modes of buying, selling, or passively earning money from your assets. Decentralized Exchanges or DEX's have made swapping native assets between each other easy and convenient for investors while sometimes offering options such as yield farming as a means for investors to earn on their tokens. While other options offer strictly a marketplace for investors to buy and sell NFT's, some of which can be used in a variety of play to earn games that have recently witnessed explosive growth. As these DEX's become increasing in number, it often seems as though there are too many options to weigh and trust. Keeping track of where your assets are located and transferring between them through different protocols is burdensome and are often on exchanges that seemingly pop up overnight. Having the benefits of a decentralized exchange that offers a

variety of options that evolve with the increasing growth of the cryptocurrency market has been shown to be in short supply.

## OUR MISSION

The world is changing. Technology specifically blockchain has disrupted the traditional way of doing business. From finance to the video game industry, blockchain has found a way to improve current business models and created countless ways to utilize these spaces. Baby Sanji provides an expansive network of income-generating platforms for the user. Within the platform, Baby Sanji holders will be able to earn rewards from staking, farming, and play-to-earn gaming. The platform also offers an NFT marketplace, swap and more.

Baby Sanji rewards holders with many different ways of generating passive income, but also desires to give back to those outside the crypto space. With Sanji-Inu, Baby Sanji will accomplish this by giving back to a variety of charities with different causes. Baby Sanji aims to be the one-stop that will incorporate the biggest needs in the cryptocurrency space.

# BS PORTFOLIO

## What is a Crypto Portfolio Tracker?

A cryptocurrency portfolio tracker is a website, app or another type of platform that allows you to manage your investments and keep track of how the value of your coins are changing.

Trackers link with your wallets and exchanges; it's a one-stop shop for everything you need to know about how your portfolio changes in value. Cryptocurrency portfolios are most useful for large-scale traders who have more than 3 coins they actively trade in a portfolio.

## What to Look for in a Crypto Portfolio Tracker

Unfortunately, not every crypto portfolio tracker is equally useful and secure. Though every portfolio tracker will offer its own individual niche to appeal to a certain segment of traders, every choice you consider should have at least these 3 basic features.

### *1. Safety and Security*

The decentralized nature of the blockchain makes Bitcoin and other cryptocurrencies exceptionally difficult to track and trace. It's also very difficult to determine who owns which wallet — and once a cryptocurrency transaction has been initiated, it's virtually impossible to get that money back.

This makes it especially important to choose a tracker that places an increased emphasis on security. Because many cryptocurrency portfolio trackers link with an exchange or your bank account, it's crucial to protect your coins and your money. A single hack or data leak can leave your wallet vulnerable, so look for security features like two-factor authentication and multi-layer encryption.

## ***2. A Clean and Clear Layout***

The purpose of having a portfolio is to quickly view all of your assets and see how the value of your portfolio changes. A good portfolio tracker shows you the total value of your portfolio on its front page or with 1 or 2 clicks.

Your tracker should be simple to operate and understand, and you shouldn't struggle to find the value of each individual coin in your portfolio. Look for a tracker with a crisp, clean layout that you enjoy looking at and using. This will save you time, stress and eye strain when using your portfolio tracker.

## ***3. A Wide Range of Available Coins and Exchanges***

A portfolio tracker should be a one-stop shop for all of your coins. Look for a cryptocurrency portfolio tracker that offers connectivity with all of the coins and all the exchanges you're on.

If you search for a combination tracker and exchange, take a look at the platform's coin offerings before you decide to sign up for an account. This will allow you to trade all of the coins you want without working with multiple exchanges and memorizing passwords.

## **Control Your Cryptos**

Cryptocurrency is an exciting new investment front — and there's never been an easier time to get started with a portfolio tracker or an individual exchange. However, it's important to remember that cryptos are also still a very volatile market and it's possible to lose money overnight.

Be a smart investor and do your due diligence before you buy any security. Always remember not to invest more than you can afford to lose.

# BS STAKE

## What is Staking?

Staking is the process of locking up crypto tokens in order to obtain rewards or earn interest.

Cryptocurrencies are built with blockchain technology, which means crypto transactions must be verified and the results stored in the blockchain. Staking is one way of validating those transactions.

## Why BS Stake?

With BS Stake, holders of the Baby Sanji token are able to allocate their tokens while obtaining rewards. Commit Baby Sanji to help maintain the security of the network, confirm transactions, and increase efficiency. Here holders of Baby Sanji will let their tokens do all the work while they reap the benefits from just holding.

# BS SWAP

## What is Swap?

Token swaps are the most common way of interacting with BS Swap. For end-users, swapping is straightforward: a user selects a BEP20 token that they own and a token they would like to trade it for. Executing a swap sells the currently owned tokens for the proportional amount of the tokens desired, minus the swap fee, which is awarded to liquidity providers.

## Why BS Swap?

Swapping with BS Swap is a permissionless process. Swaps using BS Swap are different from traditional order book trades in many central exchanges where they are not executed on a first come, first serve basis. Rather, swaps execute against a passive pool of liquidity, with liquidity providers earning a percentage of fees proportional to their capital committed.

# BS COMMUNITY UTILITY

## Baby Sanji Charity

As holders of Baby Sanji are being rewarded from the numerous income generating streams provided, Baby Sanji wanted to create added value to our token by giving back to those outside of the crypto space, reaching a wider network of individuals. Baby Sanji desires to leave an everlasting impact on people, benefiting future generations. With Baby Sanji Charity, Baby Sanji will look towards donations to charitable organizations, helping those in need.

To build a world free of pain and loss. The BS Fund will be donated and built houses, schools, orphanages for countries in need. This helps to develop society, reduce the number of homeless people and create more jobs and jobs for people. In addition, this feature can attract large investors to support to expand the project scale to a new development level.

# UPCOMING BS UTILITIES

## BS HARVEST

Yield farming lets users lend or stake their crypto in exchange for interest and rewards similar to how an investor earns interest on money in a savings account. Holders of Baby Sanji will be able to do this by adding their tokens to the BS Harvest yield farms earning interest while allowing other potential holders to borrow assets from the lending platform. Harvesting Baby Sanji is a risk-free way to earn passive income with some of the most competitive rates on the market.

## BS PLAY

Gaming has come a long way in recent years and has become one of the top grossing industries worldwide earning \$155 billion dollars in 2020. As the market approaches a new frontier in the blockchain space, more and more gamers are at the verge of a dramatic shift in financial freedom. BS Play provides incentives with play-2-earn rewards due in large part to NFT's, or non-fungible tokens. These tokens allow holders to show ownership of digital assets and provide real world value. Each NFT is unique, with custom rarities and attributes that are backed by the immutability and structure provided by blockchain technology.

# TOKENOMICS

Project Name: Baby Sanji

Symbol: \$BABYSANJI

Total Supply: 100,000,000,000,000,000 (100 Quadrillion)

65.70%  
Presale

32.77%  
Liquidity

1.44%  
Unicrypt Fee

0.09%  
Burnt

## TRANSACTION FEE

With Baby Sanji, each buy incurs a 6% transaction fee, which is distributed accordingly:

- 2% HOLDER Rewards
- 2% Charity fund
- 2% Development & Marketing

Each sale of Baby Sanji also incurs a 6% transaction fee, which is distributed accordingly:

- 2% HOLDER Rewards
- 2% Charity fund
- 2% Development & Marketing

## **Marketing & Development Wallet**

To promote the Baby Sanji ecosystem, 2% of each purchase and sale fee will automatically contribute to the marketing and development wallet. Baby Sanji has provided a healthy allocation for this wallet, as the ecosystem will need to undergo extensive development to become a viable player in the global market. No project can develop without a large number of investors. In order to achieve steady growth of investors, Baby Sanji plans to work with many influencers and marketers to meet those needs. The partnership with BTOK, a blockchain and media marketing consulting group, will further expand Baby Sanji's reach to other investors. Expenses incurred from marketing and development wallets will be open and transparent, building trust and relationships with our investors.

## **Blockchain**

Baby Sanji will harness the power of Binance Smart Chain (BSC) and blockchain technology to provide our users with distributed ledger technology and the security of contracts that execute without a third party, or smart contracts. The BSC offers an extremely large user base because of their EVM compatibility and provides the same smart contract capabilities as Ethereum because they are an Ethereum-compatible blockchain. Despite being somewhat centralized, BSC provides users with lightning-fast transaction speeds and the ability to access tokens and products through multiple wallets. The extremely low fees in comparison to Ethereum make the BSC an affordable option for our investors and suitable for long term use for NFT gaming and staking.

## Coinscope Audit

Smart Contracts and their developers are subject to flaws and require auditing by third parties to ensure accuracy and provide trust in their development. Baby Sanji is undergoing an Coinscope audit before the public launch of the token. The Coinscope audit is the most thorough and in-depth auditing platform that specializes in extensive analysis of solidity codes and contracts to eliminate any security vulnerabilities or exploits using the most rigorous and thorough cybersecurity techniques. Baby Sanji is committed to openness, transparency, and values the trust of their community of investors.

## Future Baby Sanji

Baby Sanji is committed to the growth and expansion of the ecosystem. As opportunities present themselves in the DeFi, NFT, and Play to Earn spaces, Baby Sanji will take advantage of these new and exciting opportunities providing more value to their investors. Baby Sanji has positioned themselves to become one of the leaders in the fast moving crypto space.

# ROADMAP

## Phase 1

- White Paper 1.0 release
- Website and Socials
- Smart contract deployment
- Community building
- Audit Coinscope

## Phase 2

- KYC Coinscope
- Open competitive whitelist
- Heavy marketing before Presale
- Open presale at Unicrypt
- Listed on Pancakeswap

## Phase 3

- Reach more than 2,000+ HOLDER
- Listing on CoinMarketCap
- Listing on Coingecko
- Reach more than 5,000+ HOLDER
- Marketing campaign

## Phase 4

- Update information and logo on TokenPocket
- Update information and logo on BSCscan
- Setting Up BABYSANJI Charity
- Reach more than 10,000+ HOLDER

- Update information and logo on Trust Wallet

## **Phase 5**

- Update information and logo on PooCoin
- Open BABYSANJI Portfolio
- Reach more than 25,000+ HOLDER
- Open BABYSANJI Swap
- Establishing Charity Partnership & Donation

## **Phase 6**

- Reach more than 50,000+ HOLDER
- Preparing to list on major exchanges
- Big Marketing Push (i.e BTOK Ads)
- Designing our first NFTs
- Launch of the NFT collection

## **Phase 7**

- Strong marketing into the global NFT community
- Open the first 1000 NFT mint
- Full Marketing Push
- Detailed Whitepaper for BABYSANJI App
- Making bigger Strategic Partnerships

## **Phase 8**

- Releasing our official Mobile App on Appstore and Playstore
- Releasing V1 of BABYSANJI App
- Testing V1 of the App
- Fixing bugs
- The Future and Beyond
